

Accu-Break Pharmaceuticals, Inc

Precision Dosing Through Innovative Tablet Technologies ▶

ACCU-B™

Set the Standard for Dose Flexibility for Single and Combination Drug Products

Patent pending Accu-Break™ technologies create unique tablets that contain a drug-free break layer for easy and precise dose adjustments

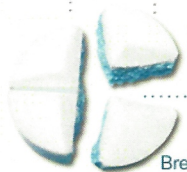

ACCU-B™ Bi-Layer Technologies

Deep scored drug layer is pre-divided into half doses

Drug-free break layer

Breaks into exact partial doses

Break occurs through drug-free layer

▶ Tablets can be Bisected, Trisected, Quadrisected, Pentasected and Octasected

Scored, drug-free break layer

Combination Drug

Breaks into exact half doses of the combination

Combination Drug

- ✓ 100% dose accuracy when dividing
- ✓ Ability to titrate and perform fine dose adjustments
- ✓ Ability to achieve in-between doses
- ✓ Patent pending technology

Clinically Relevant Competitive Advantages

- Low cost, low risk reformulation of existing or new product strengths
- Create new intermediate doses
- Develop market differentiated line extensions via novel configurations such as bisect, trisect, quadrisect, and even pentasect and octasect tablets
